

How long have you done business here?

Exact Solar Answer:

We have been installing solar energy systems in southeastern Pennsylvania and south-central NJ for over 12 years and are expert with all requirements and procedures. We have worked with every local utility, too.

Are you licensed and insured?

Exact Solar Answer:

Exact Solar and anyone we employ carry all required licenses and insurance for every aspect of our work.

Do you provide past references?

Exact Solar Answer:

We provide testimonials and references from our years of work throughout Pennsylvania and New Jersey.

Do you design your systems?

Exact Solar Answer:

Yes. After years of experience, we have selected the best tools and practices for design. Our best-in-practice tools and customized designs allow us to estimate future productivity of systems with incredible accuracy.

Do you offer me options?

Exact Solar Answer:

We not only offer options to give you the best performance and value for your exact conditions, we explain and answer your questions in simple terms.

Will I need to do any paperwork?

Exact Solar Answer:

Not really. Exact Solar provides start to finish support including all permits and applications. We assist in managing SRECs, too. You simply sign a contract!

Do you subcontract any work?

Exact Solar Answer:

We employ our own installation crews including project oversight. A staff electrician supervises each project to make sure the installation meets all local codes. We stand behind our quality workmanship.

How do I ensure top performance?

Exact Solar Answer:

Exact Solar systems include panel level monitoring which also provides alerts. This helps us respond quickly to help you resolve any performance issues.

How do you help with financing?

Exact Solar Answer:

We are committed to affordable solar for families with a wide range of budgets. From flexible and zero down payments to great loan terms, there is a solution for nearly every homeowner.

What makes you different?

Exact Solar will forever be local. It is the only way to provide reliable, custom solutions for the area. Our customer-first focus above all means:

- ➔ **Our installation team focuses on maximizing quality in their work**, not the quantity of panels installed. Unlike large national installers, our team is rewarded for overall quality and customer satisfaction, not the number of kW's installed.
- ➔ **Each customer and home gets the tailored solution they require**, even if it means slightly longer installation times. We recognize that our customer and their home are unique. In our world, there are no "standard" installations, just standards of quality.
- ➔ **Anyone you contact will work to get you information and answers**. No runaround. No such thing as too many questions.

Some other ways we distinguish Exact Solar:

We know the area and the utilities well. From billing statements to upcoming rule changes, there are no surprises.

Our services have been perfected over the years based on what works EXACTLY for southeast Pennsylvania and south-central New Jersey, and nowhere else.

Exact Solar remains a small business. Long term relationships and highly satisfied customers matter most to us.
